

“VI PJP – Modern Construction Management Methods”

Tallinn University of Applied Sciences, Pärnu mnt 62, Auditorium
11.11.2015, beginning 9:00am

Never before has construction industry evolved so rapidly, thus, we also need to go along with the world-wide changes. Accordingly, Estonian Group for Lean Construction has decided to change the name of Project Manager's Day to Modern Construction Methods. Organizers believe that the new name better reflects the nature of the conference and do not constrain the subject areas. This year, we have two keynote speakers, professor Rafael Sacks and our own Estonian lean expert Meeli Linnik. The main topic of the day is the management and organization of construction production. Rafael will reflect on the changes over the last four years and Meeli will provide case studies on Lean Construction.

Agenda

REGISTRATION 70 €

(Includes materials and lunch)

- 09:00 – 09:30 Registration to conference
- 09:30 – 09:45 Opening conference (Prof. Roode Liias and Enn Tammaru)
- 09:45 – 11:15 **Rafael Sacks** (Technion - Israel Institute of Technology): Tidhar Way for implementing lean and BIM practices
- Pause 20 minutes -----
- 11:35 – 12:05 **Jüri Rass** (Novarc Group AS): Construction innovation cluster
- 12:05 – 13:00 **Meeli Lille** (HerreroBoldt, US): Lean production management methods on large-scale hospital projects in San Francisco
- Pause 60 minutes -----
- 14:00 – 14:30 **Taavi Jakobson** (Kodasema): Project management based on the method of “Chaos”
- 14:30 – 15:00 **Alan Väli** (Leansite OÜ): Web-application for managing construction site production
- 15:00 – 15:30 **Keit Paal** (Merko Ehitus AS): Implementing BIM in a large general contracting company
- 15:30 – 16:30 **Egert-Ronald Parts** (Tallinna Tehnikakõrgkool): Demonstration of the immersive BIM CAVE (2 groups, 30 people each and 30 minutes)
